TITLE : CONNECTING STRUCTURE OF SOLID ELECTROLYTE FUEL CELL

ABSTRACT : PURPOSE: To provide electrical connection structure between a flat plate cell of a solid electrolyte fuel cell and its interconnector in which electrical connection of the flat plate type solid electrolyte fuel cell is made uniform.

CONSTITUTION: In the connection structure between a flat cell plate 14 of a flat plate type solid electrolyte fuel cell and its interconnector, conductor pellets 100 made of conductive ceramic are stuck to each of an air electrode 13 and a fuel electrode 12 through a conductive material 101 which is sintered at around operating temperature of the flat plate type solid electrolyte fuel cell to electrically connect to the flat plate interconnector.
